SUMMARY

Full-stack mobile and web developer specializing in cross-platform Flutter applications and scalable backend systems. Experienced in building platforms using Firebase, Supabase, Node.js, and REST APIs with real-time data synchronization and role-based access control. Founder and solo developer of Supra, a restaurant reservation platform aimed at modernizing restaurant booking and operational management.

EXPERIENCE

- Founder & Solo Developer – Supra** Nov 2025 – Present
Restaurant Reservation Platform (Startup Project) Tbilisi, Georgia
 - Platform Architecture:** Founded and architected Supra, a full-stack restaurant reservation ecosystem including a consumer mobile application, restaurant tablet management software, and operational dashboards.
 - Booking Infrastructure:** Designed scalable booking infrastructure supporting real-time reservations, availability management, table assignments, approval workflows, and restaurant scheduling operations.
 - Mobile Platform:** Developed cross-platform Flutter applications for iOS and Android integrated with Firebase backend services and real-time Firestore synchronization.
 - Backend Systems:** Designed backend architecture using Firebase, Supabase, and Railway including authentication flows, API integrations, and role-based access control for customers, restaurant staff, and administrators.
 - System Design:** Structured scalable data models and modular application architecture designed to support multi-restaurant expansion and operational dashboards.
- IT & Software Systems Specialist** Jun 2017 – Nov 2025
Independent / Contract Work Tbilisi, Georgia
 - Infrastructure Management:** Managed IT infrastructure including servers, networking systems, and backend environments supporting internal applications and business systems.
 - Web Development:** Developed company websites and internal web applications with backend integrations and database functionality.
 - Automation:** Built automation tools and internal software solutions improving operational workflows and reducing manual processes.
 - Technical Support:** Provided troubleshooting and support across hardware, networking, and software environments.

TECHNICAL SKILLS

- Languages:** Dart, JavaScript, TypeScript, SQL **Frontend:** Flutter, React, HTML5, CSS3
- Backend:** Node.js, REST APIs, OAuth/JWT **Databases:** Firestore, PostgreSQL
- Cloud:** Firebase, Supabase, Railway **Tools:** Git, Postman

EDUCATION

- San Diego State University** Sep. 2016 –
Computer Science
